

Spatial Stories IP2a Field Guide

现场执行指南 | Zixu Yang 48939559 | 22 September 2026

Before the session 测试前

Use the tested full Quest build and keep the same build for every participant.

使用已测试的完整 Quest 版本，所有参与者使用同一版本。

☐ Record the actual date and build ID on each form. Print the English plan, this guide and P01 to P05 forms; P06 is a spare.

在每张表填写实际日期及版本。带上英文计划、本指南和 P01 至 P05 记录表；P06 备用。

☐ Charge the headset, both controllers and laptop. Bring the USB data cable, charger, pen and timer. Confirm access to the Quest for class.

给头显、两只手柄和电脑充电。携带 USB 数据线、充电器、笔和计时器，确认课堂能使用 Quest。

☐ In Meta Quest Developer Hub, use Device manager, then Device Actions and Cast. Keep the USB connection and headset awake.

在 Meta Quest Developer Hub 中进入 Device manager，再到 Device Actions 点击 Cast。保持 USB 连接及头显唤醒。

☐ Before participants arrive, run one pilot through all eight actions, review, confirmation and reset. Test optional Undo immediately after deleting.

参与者到场前自行完整试跑八项操作、预览、确认和重置；删除后立即检查 Undo。

☐ Use a clear play area and fitted wrist straps. Explain that the participant may stop at any time.

留出清晰可用的活动区域并佩戴手柄腕带，说明参与者可以随时停止。

Keep the record consistent 统一记录

Use one two-page form per participant. Record every post-start hint where it occurs; input practice before timing is recorded separately.

每人一份两页记录表。开始计时后的每次提示都记录到对应步骤；计时前的按键熟悉单独记录。

Before the next person, save the notes, stop any recording, clear all prior content and return to Welcome.

换人前保存记录、停止录像、清空上一位内容，并回到 Welcome 欢迎页。

Facilitator script 主持人话术

I am testing a prototype for creating a Story in VR. You can stop at any time, especially if you feel uncomfortable. May I take anonymous notes for the course evaluation and an anonymised summary in my report and project repository?

我正在测试 VR Story 原型。你可以随时停止，尤其是感觉不舒服时。我可以做匿名记录用于课程评估，并在报告及项目仓库中呈现匿名总结吗？

May I also record the headset view for reviewing this test? Recording is optional, and you can still take part without it.

我可以额外录制头显画面用于复盘吗？录像是可选的，不同意也可以参加测试。

Explain the controls 说明基础按键

Point with the controller and press the front trigger with your index finger to select. Hold the side grip with your middle finger to hold an object; move or turn your hand, then release to let go. Hold the same object with both grips and move your hands apart or together to resize it.

用手柄指向目标，食指按前方 Trigger 选择。中指按住侧面 Grip 抓住物体，移动或转动手，再松开放下。双手同时用 Grip 抓同一物体，拉开或合拢以调整大小。

Let us briefly practise the controls before timing. I will not demonstrate the Story task. Please tell me if any button is unfamiliar.

计时前先熟悉基础按键。我不会示范完整 Story 任务；如果不熟悉某个按键，请告诉我。

Facilitator: use a non-task object if available. Otherwise explain and practise the button presses without activating tools. If a task action is rehearsed, record that exposure. Reset afterwards.

主持人：如有非任务物体，用它练习；否则只说明并练习按键，不操作任务工具。若练习涉及核心步骤，记录该暴露情况，然后重置。

Run the task 开始任务

Read the next page in full. Ask the participant to think aloud, say Begin, and start the timer. Allow up to four minutes for the core task.

完整读下一页任务。请参与者说出想法，说“开始”后计时。核心任务最多四分钟。

If no progress occurs for ten seconds or help is requested: “What on the screen might help you continue?” Record this as a prompt. Give a specific cue only if still needed, and record it separately.

十秒没有进展或对方求助时间：“画面上有没有什么能帮助你继续？”这算一次提示；仍需要帮助时再给具体提示，并另记一次。

Control reminders during the timed task count as prompts. On-screen guidance does not count as facilitator help. Stop the core test and timer for discomfort or a blocking technical interruption. Mark Interrupted; later demonstrations stay outside core scores.

计时后按键提醒算提示，系统提示不算。遇到不适或阻断任务的技术问题，停止任务和计时并标记中断；后续演示不纳入核心成绩。

Spatial Stories Task Card

参与者任务卡 | Read the English or Chinese version consistently

Your task 你的任务

Choose a photo for a Story and inspect it up close. Add text and a sticker to the photo. Move, rotate and resize at least one editable item. Remove one unwanted item, keeping some content on the Story, then review and publish when you are satisfied.

选择一张照片制作 Story，并近距离查看。给照片添加文字和贴纸。移动、旋转和缩放至少一个可编辑元素。删除一个不需要的元素，同时保留部分内容；满意后预览并发布。

A short caption is enough. You may use your own words or the text options already available.

简短文字即可，可以输入自己的内容，也可以使用已有文字选项。

Please say what you are looking for and what you expect to happen as you work.

操作时请说出你在找什么，以及你预期会发生什么。

Publishing is simulated inside this prototype. Nothing will be uploaded to Instagram.

发布仅在本原型内模拟，不会上传到 Instagram。

Tell me whenever you want to stop or feel uncomfortable.

如果想停止或感觉不舒服，请随时告诉我。

After the task 任务结束后

I will ask about ease, naturalness and comfort, the most confusing action, and one thing you would change.

我会询问易用性、自然度、舒适度、最困惑的操作，以及你最想修改的一点。
